

Vector

Vector

Cross product

LINE

```
graph TD; V1[Vector] --> CP(Cross product); V2[Vector] --> CP; CP --> L[LINE];
```

The diagram is a flowchart illustrating the relationship between two vectors, their cross product, and the resulting line. At the top, there are two rectangular boxes: a blue one on the left and a green one on the right, both labeled "Vector". Arrows from both boxes point downwards to a central, white rounded rectangular box labeled "Cross product". From the bottom of this central box, an arrow points downwards to a yellow rectangular box labeled "LINE".
