

Point

Point

Create Line

LINE

```
graph TD; P1((Point)) --> CL(Create Line); P2((Point)) --> CL; CL --> L[LINE];
```

The diagram illustrates a process flow. At the top, there are two circular nodes, one blue and one green, both labeled 'Point'. Arrows from both nodes point downwards to a central rounded rectangular box labeled 'Create Line'. From the bottom of this box, an arrow points down to a yellow rectangular box labeled 'LINE'.
